## ANN GORDON

Ann Gordon is interested in the interplay between the urban environment and nature. Particularly the way birds interact with city life. Street art continues to be a source of inspiration and is often incorporated into her paintings. Photography, collage, painting and drawing are combined within the layering process of encaustic. Complete paintings emerge. By often painting birds within her artworks, Ann aims to highlight the conflicting stories within the urban landscapes, as well as portraying human characteristics and emotion. Her aim is to express the complexity of our environments by exploring the competing relationships between nature, the city life and structures and ultimately ourselves.
